

Back to Skool is an interactive event taking you back to the classroom to see how well your "adult" team can work together ! All teams will be given caps and ties to signify their teams and the Headmaster will call Assembly to brief the teams on what is expected of them in School.

Depending on time available will depend on the Classes and End of Skool Assembly/Finale – guaranteed to bring out the child in you !

LTD

BACK TO SKOOL

● CLASS 1 HOME ECONOMICS

The pupils will be given a short amount of time to ice a cake and present it to the rest of the class – the best cake will go through to the School Bake Off !

● CLASS 2 – SCIENCE

The pupils must split the units of highly dangerous Kraptonite into stable units. The difficulty is that they only have 3 odd sized containers. The correct apparatus and protective clothing must be worn.

● CLASS 3 – HISTORY

The general and his troops are left to guard the castle whilst the king is away on crusade. In order to feel protected the general likes to look from the turret of the castle and see 30 soldiers to each of the North, South, East and West sides. Eighteen surviving soldiers return from the crusade and have to be integrated with the existing 80 men so that 30 soldiers can still be seen from every direction. A mathematical problem in History !

● CLASS 4 – DRAMA

The Pupils will all be given a box of clothes and will all choose an envelope which will include a famous film or song title – examples such as: Pirates of the Caribbean, Mama Mia and Star Wars and will be required to write, direct and perform an impromptu performance.

● CLASS 5 – PHYSICS

Faced with a gorge, the teams have to get safely across using the equipment provided, collecting buckets full of water along the way. Once safely through the gorge the team has to safely remove the nuclear bomb from the chamber – water is a key element to complete the task. This is one of our more adventurous tasks and requires the team to use strong communication skills, delegation and evaluation are also key factors.

● CLASS 6 – WOODWORK

The Pupils will need to build a suspension bridge over which a remote controlled vehicle is driven – collectively at the class assembly all pupils are given instructions and various materials in which to achieve this. It will require the team to plan, design, build and test their section of the structure. Each of the bridges will need to be given load bearing certification on completion of the remote control car passing over it and so a cage will be hung from the underside of each bridge in turn, weights applied and tested (this has the potential for being very amusing!).

● CLASS 7 – MUSIC

Pupils will have to complete a full music class including My Kind of Music , Sing the Intro, Music Trivia, Twisted Tunes, Gobbledigook lyrics, Who the Buzzcocks are You and I've Heard That Somewhere Before ?!

● CLASS 8 – PHYSICAL EDUCATION

A good old fashioned School Sports Day with 3-legged races and the Wheelbarrow to name but a few !

● FINAL LEAVERS ASSEMBLY

The Headmaster will call all classes for a final assembly to complete for the Head Class Award. The finale will bring the classes together and can include a Drama show, Bridge Break Finale (Woodwork) or a PE Finale with a big class against class School Sports Day.
